Key pad Column

$$I_{pull\ up} = \frac{V_{DD}}{R_{pull\ up}} = \frac{5.3V}{10\,mA} = 412\ \Omega \quad \text{used } 10k$$

NPN $I_{NPN} = \frac{3.3V - 0.7V}{10\,mA} = 390\ \Omega$ used 10k

PNP base current

$$I_{PNP} = \frac{3.3V - 0.7V - 0.4V}{8\,mA} = 275\ \Omega \quad \text{used } 560\ \Omega$$

Quad Display: $\frac{3.3V - 0.1V - 1.7V}{8\,mA} = 187.5\ \Omega$ use $220\ \Omega$
